

ECO RULES

WHEN DISPOSING OF TRASH

We sort it and put it into
color trash bags

This is environmentally friendly
and facilitates recycling

WHEN USING WATER

We control its flow and turn off the faucet when
there is no need to use water

We reduce water consumption and related
costs and protect natural resources

BY USING E-MAIL

We limit the number of printed
messages to the minimum necessary

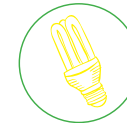

We reduce the energy and paper
consumption and the amount of waste

WHEN LEAVING A ROOM

We turn off lights and electronic devices

We save energy and minimize costs, we make
the most of the daylight

WE COLLECT AND USE RAINWATER

Rainwater has a low pH, which makes
it perfect for watering all plants

We protect the environment and save money;
in addition, the water collected in a tank
comes in handy during a drought

WHEN USING AIR CONDITIONING

While the air conditioning is on, we do not
open windows or doors, on hot days we set the
temperature 5-7 degrees lower than the outside
temperature

We avoid energy losses

WE USE PHOTOVOLTAIC PANELS

We use solar energy

We use green energy that does not
destroy the environment

PLASTIC WASTE FROM MACHINING IS SORTED APPROPRIATELY

Cut-offs and shavings are carefully sorted into material groups,
properly stored and transported with due care. Then, subjected
to industrial reprocessing, they continue to serve society.

We keep the environment healthier

WHEN DISPOSING OF EMPTY PACKAGING

We crush it first, unscrewing bottle caps

We reduce the surface area of garbage,
accelerate the process of its decomposition
and reduce the costs of transportation
